

The **CIMEC Lab Fair** is an annual event where all the research groups active at the center present their ongoing strands of research to students. The **2018 CIMEC Lab Fair** will happen on the 15th of November 2018, from 1 p.m. to 5 p.m., at Palazzo Fedrigotti in Rovereto.

The main aim of the **Lab Fair** is to present a broad overview of all the research possibilities at CIMEC, mainly to students who are looking for internships, thesis proposals, or who are just curious about CIMEC.

During the **Lab Fair**, representatives of each research group present a poster which summarizes the group's research lines. All the posters are presented simultaneously, in different areas, to small groups of students – which means that, by the end of the **Lab Fair**, students will have had the possibility of listening to all of the presentations.

The **Lab Fair** also constitutes a good occasion for meeting directly with the Principal Investigators (P.I.) and with Phd students and post-doc researchers working at the center.

This is the schedule of the **2018 CIMEC Lab Fair**:

13-13.30	General presentation of the Lab Fair & overview of the research groups (for students only!)
13.30-14	Lunch buffet
14-17	Poster session – presentations of the research groups
17-17.30	Closing time: coffee & sweets
